

Sava

EUROPEAN QUALITY TIRES

Tires for cars, vans and light trucks 2010

www.sava-tires.com

* All Sava consumer tires are warranted against workmanship and material or design related conditions according to the Sava EMEA warranty conditions for tires. The warranty terms and conditions applicable in a specific country may be obtained from the tire dealers in the respective country upon request.

Sava, European quality tires

Across the globe, Sava is well-known for producing quality tires, which deliver reliability and longevity. It offers a great tire range as a genuine alternative to more expensive brands. The proven tire technology featuring Sava tires provides a balanced package of durability without compromising performance. Sava offers what many motorists consider as the perfect combination: reliable tire performance at a reasonable price.

More than 85 years of expertise

Sava is one of the largest and most successful tire manufacturers in Central Europe. From its home market Slovenia, Sava tires have spread throughout the world, with growing success in the Western European markets. Sava's roots of tire manufacturing in Slovenia go a long way back in time, accumulating more than 85 years of expertise in rubber industry. To keep up with the latest tire technologies and to strengthen its market position, Sava stepped into a partnership with The Goodyear Tire and Rubber Company in 1998.

Sava in figures

Sava tires are manufactured in various factories in Europe. However, many tires are still manufactured in the Sava factory in Slovenia, which is a state-of-the-art production facility specialised in the production of high performance summer and winter passenger car tires. The annual output of Sava factory in Slovenia is around eight million tires. Annually, almost the same number of Sava tires is being sold worldwide. Sava employs more than 1.600 employees in Europe and provides a wide range of passenger car tires, light truck tires and truck tires.

Sava standards

Sava tires are manufactured to the highest standards on the latest tire production machines in the world. Sava is featuring demanding quality and environmental standards.

perfecta

ST
STANDARD

Sava perfecta – for high mileage. The summer tire - perfecta - is characterised by optimised contours and a special 4-rib tread design; resulting in more rubber in contact with the road.

The tire contour and tread design together with a special tread compound ensure high mileage, regular tread wear and good performance on wet road surfaces - especially in braking and handling. All these make perfecta a reliable choice for economy oriented drivers.

1. High mileage

- 4-rib tread design
- Optimised tread contour
- Special tread compound

2. Good wet braking performance

- Special tread compound
- Optimised tire contour
- Design with increased biting edges

3. Aquaplaning resistance

- Wide longitudinal grooves
- Radial grooves
- "Boomerang" grooves

4. Low noise level

- Different tread block sizes
- Optimised tread block distribution

T = max. 190 km/h

intensa hp

HP
HIGH
PERFORMANCE

The recently developed intensa hp high-performance tire features a new tire construction, which together with optimised tread design and latest silica compound provides good mileage performance combined with high performance standards. The optimised tire cavity contributes to uniform wear whereas the tread design together with a new polymer in the compound enhances mileage. The new silica compound provides a better grip in wet allowing shorter braking distances and better handling control.

1. Outstanding mileage performance

- New silica compound with polymer blend optimised for mileage
- Optimised tread block design
- Optimised Land-to-Sea ratio

2. Wear uniformity

- Flatter cavity for optimised contact patch
- Wider cavity for optimised pressure distribution
- Flatter baseline for optimised pressure distribution

3. Exceptional wet braking and wet handling performance

- High number of biting edges
- Optimised shoulder and intermediate blades
- New silica tread compound

4. Low rolling resistance

- Optimised low-weight tire construction
- New silica tread compound

intensa uhp

NEW

The Sava intensa uhp is our new ultra high performance summer tire. It combines excellent dry and wet handling performance with attractive pricing. On top of that, the new Sava intensa uhp offers lower fuel consumption levels through low rolling resistance, a lightweight construction and low energy dissipation due to its new full silica tread compound.

In short, this is the perfect tire for cost-conscious drivers of high performance vehicles and sports cars.

-----------	--------

1. Very good dry handling performance

- Stiff outside shoulder block for safer cornering
- Wide cavity shape for optimised pressure distribution during cornering
- Large center rib for precise steering

2. Excellent wet performance

- New full silica tread compound technology for optimised traction
- Wide circumferential grooves to absorb and disperse water

3. Low fuel consumption

- New series of low rolling resistance carcass materials
- New light-weight construction
- New full silica tread compound technology with low energy dissipation

4. Low noise level

- Optimised 68-pitch sequence to control noise energy distribution
- Narrow lateral shoulder grooves to optimise pattern noise level

255/55R18 109W XL

Our new Sava intensa suv tire is a high performance summer tire especially developed for SUVs. With a combination of excellent dry and wet handling performance and attractive pricing, the Sava intensa suv is the tire of choice for SUV drivers. Moreover, the new Sava intensa suv offers high steering precision and cornering performance.

All in all, this is the perfect tire for cost-conscious drivers of SUVs that demand high performance.

1. Robust tire construction for SUV application

- Dual ply carcass with reinforced construction for load carrying capacity
- Polyamide overlay for V and W high speed ratings

2. Good dry handling

- Stiff outside shoulder block for safer cornering
- Cavity shape for optimised pressure distribution during cornering
- Large center rib for precise steering

3. Remarkable wet performance

- Improved tread compound with an optimised silica level
- Wide circumferential grooves to absorb and disperse water

4. Low noise level

- Optimised 68-pitch sequence to control noise energy distribution
- Narrow lateral shoulder grooves to optimise pattern noise level.

adapto

NEW

ST/HP
STANDARD/
HIGH PERFORMANCE

The Sava adapto is our new all-weather passenger car tire. It provides great performance in any weather condition. This is because the tire “adapts” to changes in seasonal weather conditions. The new adapto is the solution for drivers who prefer not to buy winter and summer tires, because these tires can be used throughout the year. This all-weather tire is also marked with the “snowflake” symbol which means it meets the official standards of a winter classified tire.

The new Sava adapto offers great performance all year round, come rain, snow or shine.

1. Good grip in any weather condition

- Special all-weather tread compound technology
- Proven tread design

2. High aquaplaning resistance

- Three wide circumferential grooves
- Efficient water dispersion

3. Remarkable handling and braking in wet, snow and ice

- Well-balanced tread stiffness ratio in lateral and longitudinal direction
- Special all-weather tread compound technology
- Gripping radial edges

4. Lowered noise level

- Rounded block edges
- S-shaped tread pattern
- Optimised pitch sequence for lowered noise level

T = max. 190 km/h
H = max. 210 km/h

eskimo s3

ST/HP
STANDARD/
HIGH PERFORMANCE

The eskimo s3 is a winter passenger car tire – a fitment for reliable and comfortable journey in difficult winter conditions. The unique winter tread design featuring numerous wavy blades in combination with the special silica compound provides an outstanding performance particularly on wet and snowy roads.

A snowflake symbol on the tire's sidewall certifies that the eskimo s3 meets strict winter performance standards of the tire industry.

1. Exceptional traction and braking on snow

- High blade density
- Wavy blades
- Optimised winter tread design
- Silica tread compound

2. Remarkable wet braking

- Silica tread compound
- Optimised winter tread design
- Radial blades

3. Aqua and slush planning resistance

- Directional tread design
- 3 wide and deep longitudinal grooves
- Radial grooves

4. High mileage

- Multi radius tread shape
- Optimised tread compound

eskimo ice

ST
STANDARD

Welcome on ice. The eskimo ice is a studdable winter car tire designed for use in extreme winter driving conditions, on snow and on ice. The stud locking system improves stud fixation thus providing exceptional handling, braking and traction on ice. The snowflake symbol on the tire's sidewall certifies that the eskimo ice meets the strict winter performance standards of the tire industry.

1. Exceptional traction, handling and braking on ice

- New stud locking system
- High blade density
- New high traction compound

2. Outstanding traction, handling and braking on snow

- High blade density
- New high traction compound
- Sharp tread shape

3. Aqua and slush planning resistance

- Directional tread design
- Deep circumferential grooves

4. High mileage and uniform wear

- Multi radius tread shape
- Sharp tread edge
- Optimised tread compound
